

Hôtel des Thermes
Brides les Bains
France, June 14.08

Dear Sir

I am afraid I know
of no book that will give
what you want
You might look at Romanes
Darwin & after Darwin
which is at any rate
trustworthy. I think
parts of Lotsy would be
useful. There is a small
book by R. Lock called

(I think) Evolution old &
New published last year
or '906, which gives
the Mendelian view
very well. Also a one
vol book by Kellogg
published this year or
last which seemed
fairly good.

I do not think any
one book will be more
your purpose as

I understand it. Neither Lock
nor Kellogg are very Darwinian
in spirit; they give some idea of the
anti Darwinian wave

Yours faithfully
Francis Darwin
